Sulaiman Bukhsh

Final-Year Computer Science Student | Software Developer

Email: sulaimanbukhsh@gmail.com | Location: Salford, UK
LinkedIn: linkedin.com/in/sulaiman-bukhsh | GitHub: github.com/Solatyre | Portfolio: sbukhsh.co.uk

PROFESSIONAL SUMMARY

Third-year BSc Computer Science student at the University of Salford, graduating in 2027 and seeking a graduate software developer role. Builds full-stack web applications with JavaScript, TypeScript, React, Next.js, Node.js and PostgreSQL. Shipped five projects, including an encrypted secret-sharing app and data dashboards, alongside two years of part-time work that built reliability and teamwork.

EDUCATION

BSc (Hons) Computer Science, University of Salford | Final year, expected graduation 2027

SKILLS

- **Programming languages:** JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Front-end development:** React, Next.js, Vite, Tailwind CSS, responsive web design, accessibility (WCAG), data visualisation
- **Back-end development:** Node.js, Express.js, RESTful APIs, Supabase, encryption (AES)
- **Databases:** PostgreSQL, Prisma ORM, relational database design
- **Tools and DevOps:** Git, GitHub, Docker, Vercel, GitHub Pages, ESLint, VS Code
- **AI and LLMs:** self-hosted open-source LLMs (Llama 3.1, Mistral, Qwen 2.5) with Ollama, Open WebUI and Docker
- **Methodologies:** Agile software development, version control (Git)
- **Soft skills:** problem-solving, debugging, teamwork, communication, negotiation, time management

PROJECTS

Zero-Knowledge Secret Sharer

Next.js, TypeScript, Supabase, Tailwind CSS | Live: zero-knowledge-portfolio.vercel.app | GitHub: github.com/Solatyre/zero-knowledge-secret-sharer

- Developed a full-stack web application that shares passwords through one-time links, using AES encryption in the browser so the server stores only ciphertext.
- Identified and fixed a data-deletion bug, then deployed the application to production on Vercel.

Code Tuner Viz

React, TypeScript, Express.js, PostgreSQL, Prisma | GitHub: github.com/Solatyre/code-tuner-vis

- Built a software-metrics dashboard with 5 views: overview, complexity histogram, class sizes, trends over time and repository benchmarks.
- Designed a RESTful API in Express.js and TypeScript, backed by a PostgreSQL database modelled with Prisma ORM.

Software Complexity Dashboard (team project)

React, Tailwind CSS, Node.js, PostgreSQL | GitHub: github.com/Solatyre/software-complexity-dashboard

- Collaborated with a development team using Git to deliver a data-visualisation dashboard with 5 chart types that highlights code-complexity hotspots.

Logic Loop

React, TypeScript, Vite, Tailwind CSS | GitHub: github.com/Solatyre/logic-loop

- Created an interactive e-learning application for logic and AI maths with 4 difficulty levels, quizzes and 5 hands-on labs, including k-nearest neighbours and Bayes' theorem.

WORK EXPERIENCE

Stock Taker, RGIS | 2024 - 2026

- Counted and recorded retail stock with handheld data-capture scanners across multiple client stores, meeting accuracy targets.
- Completed inventory audits as part of a team to strict deadlines and client procedures.

Property Sourcer, Self-employed

- Sourced investment properties and matched them with buyers and investors, acting as the intermediary on each deal.
- Negotiated terms with estate agents, landlords and investors, building long-term client relationships.
